MEMORANDUM FOR RECORD

SUBJECT: Project QXDown

1. Subject project, attached hereto, simply represents a revision of an existing project, bearing the same name, to bring it into line with OPC procedures under the JHEdict concept.

2. The existing Project QXDown contains substantially the same authorizations as those contained in the attached document. It also contains, however, authorizations for personnel salaries, travel, supplies, and the like now covered by the JHEdict Project for Germany.

3. As it stands, attached Project QXDown simply grants basic authorization, and funds, for miscellaneous propaganda activities, including a number which have been going on in the past under the existing QXDown concept.

4. It is contemplated that, with the approval of the attached project, the present QXDown would be cancelled.

5. The project attached confirms authorizations and operations which have been operating successfully in the past and raises no new issues or problems. Consequently, expedited approval is requested.

This document is part of an integrated file. If separated from the file it must be subjected to individual systematic review.
